

Corporate HR Policy Document

IT Security and Acceptable Use Policy

1. Device Usage: Employees must only use company-issued devices for work. Personal devices must be enrolled in the MDM program before accessing corporate networks.
2. Password Policy: Passwords must be at least 14 characters long, contain a mix of uppercase, lowercase, numbers, and symbols, and be rotated every 90 days. Sharing passwords is strictly prohibited and grounds for immediate termination.
3. Software Installation: Employees are not permitted to install unapproved third-party software on company laptops. All software requests must go through the IT service desk.
4. Data Protection: Confidential client data must never be stored on local hard drives. All sensitive data must be stored in the approved cloud storage provider (Google Workspace or AWS).
5. Phishing & Training: All employees must complete the quarterly security awareness training. Failing to complete the training within the 30-day window will result in temporary suspension of network access.
